Download

If you are searching for **CleanMyMac download for Mac**, **CleanMyMac latest version**, or a simple **Mac cleaner**, this guide explains the official download and installation process without relying on modified or unofficial installers.

Why Choose CleanMyMac?

CleanMyMac combines several Mac maintenance routines into a single application. Its Smart Care workflow can clean clutter, check for potential threats, help with performance-related maintenance, update software, and identify storage that can be decluttered. Its tools also include duplicate finding, application removal, large-file discovery, privacy cleanup, malware scanning, and cloud-storage cleanup.

Key CleanMyMac Features

- **Smart Care:** combines several maintenance tasks into one workflow.
- **System Junk:** identifies removable system and application clutter.
- **Malware Finder:** checks for potential malware.
- **Uninstaller:** helps remove applications and related leftovers.
- **App Updater:** helps keep supported applications current.
- **Duplicate Finder:** locates redundant copies of files.
- **Large & Old Files:** helps identify storage-heavy or forgotten files.
- **Privacy:** helps review supported browser and privacy-related data.
- **Cloud Cleanup:** helps review supported cloud-storage content.

Latest Version and System Requirements

Item	Current information
Latest version	CleanMyMac 5.5.7
Release date	July 22, 2026
Supported macOS	macOS 11 Big Sur, 12 Monterey, 13 Ventura, 14 Sonoma, 15 Sequoia, 26 Taho
Storage required	320 MB
Minimum display	1200 × 800 px

MacPaw states that the latest CleanMyMac does not support macOS Catalina 10.15 or earlier. Check About This Mac before installing if you are unsure which macOS version your Mac uses.

How to Download CleanMyMac for Mac

For the safest installation, download CleanMyMac from MacPaw's official download page or use one of the official marketplaces listed by MacPaw. MacPaw currently makes CleanMyMac available through the MacPaw Store, Setapp, and the Mac App Store.

Step 1 — Download

Open MacPaw's official CleanMyMac download page and download the current Mac installer. The official page provides the latest available version and system requirements.

Step 2 — Open the DMG

After the download finishes, open the downloaded DMG file from your Downloads folder.

Step 3 — Install CleanMyMac

Drag the CleanMyMac application icon into the Applications folder. This is the standard installation method described in MacPaw's current installation instructions.

Step 4 — Launch and Activate

Open CleanMyMac from Applications. Select Unlock Full Version to start the available trial or activate a purchased plan. If you already have a MacPaw license, sign in with your MacPaw Account.

CleanMyMac Editions

MacPaw currently lists three marketplaces: MacPaw Store, Setapp, and the App Store. Features can differ between editions. In particular, Apple restrictions mean that some system-level functions available in the MacPaw Store and Setapp editions are not available in the App Store edition.

Pricing and Purchase Options

MacPaw currently offers monthly, annual, and one-time purchase options in supported marketplaces. Pricing can vary by marketplace, number of Macs, country, taxes, and promotional offers, so the official store should be checked for the current price before purchasing.

How to Use CleanMyMac Safely

Before removing files, review the categories and items identified by the application. Keep backups of important documents and avoid deleting files when you do not understand their purpose. CleanMyMac should be treated as a maintenance utility rather than a substitute for macOS updates, backups, and normal security practices.

CleanMyMac vs. Manual Mac Cleanup

Manual cleanup can work for experienced Mac users, but it requires finding caches, application leftovers, large files, duplicates, downloads, and other clutter individually. CleanMyMac's main advantage is bringing many of these maintenance tasks into one interface, making routine cleanup easier to manage.

Frequently Asked Questions

Is CleanMyMac available for Mac?

Yes. CleanMyMac is specifically designed for macOS and MacPaw provides an official Mac download.

What is the latest CleanMyMac version?

MacPaw's official download page currently lists CleanMyMac 5.5.7, dated July 22, 2026.

What macOS versions does CleanMyMac support?

The latest version supports macOS 11 Big Sur, 12 Monterey, 13 Ventura, 14 Sonoma, 15 Sequoia, and 26 Tahoe.

Can I download CleanMyMac from the Mac App Store?

Yes. MacPaw lists the Mac App Store as an official marketplace, although some features differ from other editions.

Is there a CleanMyMac free trial?

MacPaw currently lists a free 7-day trial with full functionality for the MacPaw Store and App Store editions; Setapp access follows its own subscription model.

Recommended Official Resources

Use MacPaw's official download page for the installer and its official support documentation for installation, compatibility, marketplace differences, and activation instructions. This helps avoid outdated installers and unofficial modified copies.
